

## Step 3. Continued

c. hit the enter key. The system will return you directly to CUSU.

In our example, we used only one zoom action and immediately returned to the first table, CUSU. Alternatively, we could have zoomed to up to three tables successively without returning to CUSU each time. For example, assuming we needed more information, we could have zoomed from CUSU to CUSF, from CUSF to CUSC, and from CUSC to CUSN. To return, we would type an "E" in the ACTION field. Each "E" action would bring us back one screen until we were back at the CUSU table.

This document highlights the changes that MMARS users can expect under the new CORE software. As noted earlier, except for the six changes documented above, MMARS functionality remains largely unaffected by the CORE upgrade. However, in the coming months this upgrade will enable the Commonwealth to move forward on a number of innovative information technology initiatives.

If you have questions on the CORE upgrade, please call the MMARS Help line at 727-5995.
